Clean the case, acrylic frame, LCD screen and buttons with wet, soft cloth. Do not use coarse cloth, sprayers or chemical cleaners such as alcohol, benzene, etc.

## Technical parameters

Panel Brand	INNOLUX
Panel Size	7 inches
Resolution	480 * 234
Brightness	350 cd/m <sup>2</sup>
Contrast	300
Viewing angle	60/60/50/40(CR=10)
Response time	30 ms
Screen size mode	16:9
Photo changing interval	5s/15s/30s/1m/15m/30m/45m/1h
File format type	JPEG
Photo size	5.0 m pixels
Power requirement	12 V DC
Power consumption	6 W
Operating temperature	-20~65 degrees centigrade
Storage temperature	-30~75 degrees centigrade
Color	White, silver, black, pink
Dimensions	231 * 167 * 29 mm
weight	0.392 kg

### common problem and solution:

problem	Reason & solution
System can not power on	Make sure the power adapter is plugged OK Make sure the Power switch is at "ON"
	Go to maintained point for checking if problem still exist.
Can not read memory card	Memory card is not plugged OK No playable files on card The file format is not supported Photo format supported : JPEG
System can not display the photo when you enter photo mode	The picture format is not supported No photo in the card
The picture size is too small on TFT	The resolution of video/picture is small. Use Zoom function to view it.
Black blocks around the picture	● This is normal, because different DC take photo with different solution and different resolution.
